Please refer to above. The report from the con-
cerned Assistant Engineer, Shri F.C. Mittal, is received,
copy of which is enclosed herewith. There appears to be
difference in your statement and the statement of the
Assistant Engineer. I, therefore, visited the school and
found lot of defects still pending and efforts from D.D.A.
are not adequate. Assistant Engineer IV, P.W.D. Divn. No. 27
sent a list of defects vide his letter No. 1(157)/AE-IV/
P.W.D-27/DIV/site dated 25.8.90 to you as your Assistant
Engineer refused to receive that statement.

Number of floors are reverse. Dampness and seepage
noticed in toilets and other areas. The boys' toilets and
Lab. have not been handed over so far and the following
records which was promised to be handed over has not been
handed over :

1. S.M.B. ;
2. Building Register ;
3. Approved layout plan of the site and school
building ;
4. Occupation and Completion Certificate issued by
local body ; and
5. Structural and architectural drawings handed over
are not signed by any of the authorities of
D.D.A. as well as the architects. This fact was
brought to the notice while taking over the draw-
ings. Shri Hari Ram, Asstt. Engineer had promised
that he will get another set of drawings duly
signed by competent authority and hand over the
same to P.W.D. There are number of fitting and
fixtures missing in the balance rooms which have not been
handed over.

It is therefore, requested that you may please
fix up convenient time for joint inspection in the forth-
coming week to take a stock of the physical condition of
the building.
